

#6-19G Green Insulated Conductor

APPLICATION

- Type THHN Building Wire is intended for general purpose applications and may be installed in conduit, duct, or other recognized raceways in wet (60°C oil/75°C water) or dry (90°C) locations.
- For both new work and rewiring applications, the smaller diameter of the wire permits additional circuits or larger conductors to be installed in the conduit without exceeding maximum fill limitations.
- The insulation is a high quality, heat and moisture resistant polyvinyl chloride compound over which a heat and light stabilized nylon jacket is tightly applied.

STANDARD

- Underwriters' Laboratories UL 83
- Federal Specification JC-30A
- Gasoline and Oil Resistant II (UL)
- NEMA WC 70/ICEA S-95-658

Size AWG	Number of Strands	Insulation Thickness in Mils PVC	Insulation Thickness in Mils Nylon	Approx. O.D. Inches	Ampacity (1) 75°C	Ampacity (1) 90°C	Approx. Wgt. per 1000' in Lbs.
