

# ULTRASHOT<sup>®</sup> DRONE

New Design  
with  
Audible Ignition  
Alert!

**Making exothermic connections just got even easier** with Harger's new hand held DRONE - now with New Audible Ignition Alert. Utilizing a Milwaukee<sup>®</sup> M18<sup>™</sup> REDLITHIUM<sup>™</sup> XC 4.0 18 volt battery featuring a built-in fuel gauge, the DRONE makes over 1,300 connections on a single charge! The UltraBright LED indicates instantaneous ignition. Borrowing from our previous model, the dual trigger ignition design adds an additional safety measure - no accidental bumping or misfires. Also includes a 6' cord featuring a quick latch disconnect which allows for easy storage. DRONE - Audible Ignition Alert, Safe, Light-weight, Hand Held, Exothermic Connections, Extended Battery Life!

DRONE ignites UltraShot<sup>®</sup> copper drop-in weld metal cartridges that are consumed in the exothermic connection.
