Harger Lightning & Grounding
301 Ziegler Drive
Grayslake, IL 60030

Subject: Training

The training we received from Mark Harger was conducted to instruct the proper way to install lightning protection. Mark also spends time on showing videos and speaking on what not to do as far as installs. Mark spends time on proper materials to use on lightning protection installs and materials that are not allowed, as well. Individuals who receive this training from Mark Harger should have a better understanding of how to install lightning protection systems and how it works.

Thank you Mark Harger for a job well done.

James T. Jarvis
Project Manager
