

## 32T-500 Tinned Copper Lightning Protection Conductor

## **Application**

Lightning protection conductors are manufactured using a special rope lay process. This process maximizes the surface area of the conductor while allowing greater installation flexibility. Intended for use on structures up to and including 75' in height.

| Reel / Coil Size | Class                     | Number of<br>Strands      | Strand Size    |
|------------------|---------------------------|---------------------------|----------------|
| 500'             | I                         | 32                        | 16 AWG         |
| Diameter         | X-Sectional<br>Area in CM | Reel / Coil Wt.<br>(lbs.) | Wt. lbs./M ft. |
|                  |                           | <b>,</b>                  |                |
