ULTRAWELD

EXOTHERMIC CONNECTIONS

Safety Training and Certification

This hands-on training provides your team with understanding of Harger's Ultraweld exothermic welding system. The exothermic welding process is presented as a means of making permanent electrical connections. Proper training is essential for safely making high quality electrical connections.

SAFETY FIRST

You are ultimately responsible for your own safety and safety of others

Topics covered include:

- The tools required to make a connection
- Proper handling and care/cleaning of tools
- SAFETY and required PPE
- Trouble-shooting and then inspection process

Attendees gain 3-year Manufacturer's Certification

How Do You Get Started?

- Schedule your class today!
- Work with your Harger Sales Representative to schedule a training.
- Request at HargerUniversity.com

Things to Know

- Duration of class is dependent on number of attendees.
- Upon completion of training, attendees must pass a digital test to obtain certification.
- Individual digital certifications will be sent after successful class completion.
